My Dear Dr Gray

I am glad you have drawn my attention to the Vanda matter. You will find that I have made your amends. Hasty artists are so often called for by some unexpected circumstance that they have to be cashed off au grand galop; and I had quite forgotten your matter. Nevertheless poor Hooker's Japan will repay your perusal.

I broke my stud of any [redacted] in the G.H. which has a very large [redacted] in all directions.

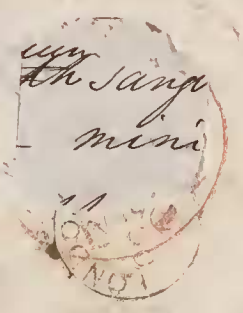
I have some tiny orchids from Wright, & some critiques on my papers. I will attend to them soon: but such misconceptions as he has revealed out are caused by the impossibility of determining the form of little membranes when flowers are dried as is frequently are. It is an acute fellow. Lately I have been running on Sunday plants & send you my first rough examination which will enable you to get them into their genera. The queried names are probably, but not certainly correct.

Many thanks for your capital paper on the Vanda which came safely.

I am glad to hear all artists engaged in working

apply any Vol. Reg. the Genera ll the order, which
have now come to such a pass that they proceed
a squad of young soldiers all in confusion during
drill — Every body has lost his head & nobody can
find it without the aid of the Sergeants

Yours truly Wm Kirkley



Dr Wm Kirkley
